## POWDER BROWS

Want beautiful looking eyebrows, all day, everyday?

We have been offering our very popular Powder Brows technique at our Brow Bar with excellent results!

Our Powder Brows technique is a semi permanent cosmetic tattoo. The best way to describe it is that it's like having a brow tint that lasts, but we have even more control in how we shape the brow. Our aim is to create soft and natural looking brows that don't look like they've been tattooed, unlike the old block looking cosmetic tattoos of the past.

It will last from 1 to 3 years depending on skin conditions and exposure to UV rays. A touch up annually is recommended to keep your Powder Brows looking fresh.

The pre-treatment consultation is a crucial part of the Powder Brow procedure where we discuss your preferences and share thoughts. Then we can decide what would be best suited to enhance your existing brow shape. This includes shaping (waxing if needed), and drawing to give you an idea of what the end result will look like. This also gives you the opportunity to go home and reflect on the consultation to ensure you are satisfied with the shape.

If you'd like to see some examples of our work, head to our Instagram and Facebook pages where you'll see plenty of before and after shots!
